

# In Life Cycle Assessment VIII

The Environment  
is Too Important  
to Guess About.

## Real Measurements Real Outcomes Real People

Wonder what the environmental impact is of any product?

Measure it!

Learn the proven methods of measuring global product impact.

From obtaining raw materials through packaging, shipping,  
recycling and disposal.

Meet the people who make sustainable environmentalism a reality.

Join us for “Calculating Consequences Beyond the Box”.

September 30 to October 2, 2008  
Seattle, Washington

American Center for Life Cycle Assessment  
Institute for Environmental Research and Education
