Setu[®] Multipurpose Chair with Lyris 2

Design Story

Designed by Studio 7.5

Setu is Studio 7.5's solution for today's more collaborative, less formal workspaces. Material innovation gives the Setu chair its unique combination of flex and strength. The Kinematic Spine™ uses two types of polypropylene to control resistance as you recline and support your weight, without a tilt mechanism. More structural element than textile, the Lyris 2™ suspension seat and back conform to your contours and aerate your body as you sit comfortably.

Setu's minimalist, dematerialized design is at home in spaces where different people may use the same chair throughout the day. A range of upholstery options means you can outfit your Setu chairs to stand out or to blend in.

Environmental Data

- 52% Recycled Content
- 5% Post Consumer
- 47% Pre Consumer
- Up to 95% Recyclability*

Life Cycle Assessment Data

- 48 kg CO₂eq Global Warming
- 0.21 kg SO₂eq Acidification
- 0.04 kg Neq Eutrophication
- 2.3 kg O₃eq Smog
- 840 MJ Primary Energy Demand
- 3.1 X 10⁻⁷ kg CFC-11eq Ozone Depletion

Environmental Certifications

- BIFMA level[®] 3
- CRADLE TO CRADLE CERTIFIED™ Bronze
- Global GreenTag™™ GreenRate™ Level A Certification
- GREENGUARD Certified
- GREENGUARD Gold Certified

Warranty

Backed by Herman Miller's 12-year, 24/7 warranty

Manufactured

Herman Miller GreenHouse, Holland, MI 49424
ISO 14001/OHSAS 18001
GreenHouse manufacturing facility uses 100% Renewable Electric Energy (through the purchase of Renewable Energy Certificates).

Disclaimer

The PCR this EPD was based on was not written to support comparative assertions. EPDs based on different PCRs or different calculation models may not be comparable. When attempting to compare EPDs or life cycle impacts of products from different companies, the user should be aware of the uncertainty in the final results due to and not limited to the practitioner's assumptions, the source of the data used in the study, and the specifics of the product modeled.

Company Description

Herman Miller creates inspiring designs to help people do great things at work, for learning, for wellness, at home, wherever people are. Our designs and the designers who work with us solve real problems for people and their organizations. This way of thinking about design has led us to be recognized as an innovator in furnishings, personal work accessories, and strategic services.

Our Sustainability Goals

We will be Resource Smart, Eco-inspired, and Community Driven.

Resource Smart

- Zero Waste
- Net Zero Water
- Net Zero Energy

Eco-inspired Design

- All products designed for the environment
- All products BIFMA level 3 certified
- Closed-Loop recycling of used product

Community Driven

- All employees engaged in Earthright
- All suppliers committed to being Resource Smart

LEED

Please refer to www.hermanmiller.com/ecoscorecard for detailed LEED information.

Packaging

Returnable packaging is available.

Supplier Support

At Herman Miller, we are committed to working closely with our suppliers to reduce our collective impact on the environment. We encourage our suppliers to minimize their operations' environmental impacts and require they assist us in decreasing our facilities' environmental effects.

Design for the Environment Criteria

Our commitment to corporate sustainability naturally includes minimizing the environmental impact of each of our products. Our Design for the Environment team applies environmentally sensitive design standards to both new and existing Herman Miller products, and goes beyond regulatory compliance to thoroughly evaluate new product designs in key areas:

• Material Chemistry and Safety of Inputs

What chemicals are in the materials we specify, and are they the safest available?

• Disassembly

Can we take products apart at the end of their useful life, to recycle their materials?

• Recyclability

Do the materials contain recycled content, and more importantly, can the materials be recycled at the end of the product's useful life?

• Life Cycle Assessment (LCA)

Have we optimized the product based on the entire life cycle?

Setu Multipurpose Chair with Lyris 2

MATERIAL DECLARATION

Functional Unit

One unit of seating for one individual, maintained over a 10-year period, including packaging materials used for the final assembled product.

Reference Flow and Product Description

One Setu Multipurpose Chair (product number CQ51MAG1G1BBNNN) with aluminum base, arms, casters, and suspension fabric seat and back—intended for use in North America—was modeled for this EPD.

Content Declaration

The chart to the right details the materials included in the product.

.....

Total Material Components

- Aluminum 46%
- Steel 17%
- Plastic 37%

Material	Mass (kg)	Mass (%)	Resource
Aluminum	4.172	46.04%	Recycled Content
Copolyester Elastomer/ Polyethylene Terephthalate	0.195	2.15%	Virgin Non-renewable
Polyamide 6	1.081	11.93%	Virgin Non-renewable
Polyamide 6/6	0.003	0.03%	Virgin Non-renewable
Polycarbonate	0.050	0.55%	Virgin Non-renewable
Polyoxymethylene	0.090	0.26%	Virgin Non-renewable
Polyethylene	0.014	0.15%	Virgin Non-renewable
Polypropylene	1.404	15.49%	Virgin Non-renewable
Polypropylene/ Ethylene Propylene Diene Monomer	0.176	1.94%	Virgin Non-renewable
Steel	1.560	17.14%	Recycled Content
Thermoplastic Elastomer	0.391	4.31%	Virgin Non-renewable
Total	9.17	100%	

Packaging*

Corrugate	2.300	94.49%	Recycled Content
Polyethylene	0.115	4.72%	Virgin Non-renewable
Polypropylene	0.014	0.58%	Virgin Non-renewable
Polyurethane with film	0.005	0.21%	Virgin Non-renewable
Total	2.434	100%	

*Returnable/reusable shipping blankets also available.

Setu Multipurpose Chair with Lyris 2

LIFE CYCLE ASSESSMENT

ENVIRONMENTAL PRODUCT DECLARATION SYSTEM BOUNDARIES

Cradle to grave, including transportation.

Product

This EPD covers the Setu Multipurpose Chair produced for use in North America at Herman Miller's GreenHouse manufacturing plant in Holland, Michigan. The EPD applies to all colors of the Setu Multipurpose Chair with arms, 5 star aluminum base, and casters. The 4 star base side chair is also included in these results. The Setu Chair without arms is excluded from this study, as is Setu Lounge Chair, and Setu Stool. The upholstered Setu is also not covered by this EPD.

Raw Material Extraction and Preprocessing

The raw materials stage covers the extraction and production of the raw materials needed to manufacture the product. It includes the processing of the extracted raw material to the point where it can be made into a recognizable part, as well as transportation of the finished raw material to the part production factory.

Production

Materials are converted into parts and assemblies and made into the final product. This stage, often referred to as Gate to Gate, includes packaging of the final product and transport of parts and assemblies to the place of final product assembly and packaging.

Distribution

Transport of the product to the final customer, including retail and warehousing. Herman Miller products generally ship directly from the manufacturing plant to the final customer and are not sent to retail or warehousing.

Usage

Use, maintenance, and regular cleaning of the product. Herman Miller seating products are generally cleaned with a dry or damp rag and do not typically require maintenance during their warranted lifetime.

End of Life

End of life treatment of the product including landfill, recycling, waste-to-energy process, and transportation to the place of final disposal or recycling. We design our products to be easily disassembled and recycled; however, in this study, our product was modeled using the national average recycling values. As a result, more of our materials were modeled as going to the landfill than should occur in actual practice. Herman Miller also offers programs to help our customers find homes for their furniture and materials at end of life.

Setu Multipurpose Chair with Lyris 2

Life Cycle Environmental Impacts

	Impact Category	Unit	Total	Methodology
	<p>Acidification Potential</p> <p>Atmospheric deposition of substances that can cause a change of acidity in the soil. Changes in levels of acidity can cause a shift of species to occur.</p>	kg SO ₂ -eq	0.21	TRACI 2.1 as based on ASTRAP (Shannon 1991, 1992)
	<p>Eutrophication Water</p> <p>Nutrient enrichment of the aquatic environment that impacts its ecological quality of water.</p>	kg nitrogen-eq	0.04	TRACI 2.1 as characterized by the Redfield Ratio Model (1963)
	<p>Global Warming Potential (100 Years)</p> <p>A measure of the potential of emitted gasses to cause an increase in the radiative forcing potential of the atmosphere leading to climate change.</p>	kg CO ₂ -eq	48	TRACI 2.1 as characterized by IPCC 2001, 2007
	<p>Photochemical Ozone Creation Potential (Smog)</p> <p>Air pollution derived from man-made emissions to the atmosphere that can potentially cause ground level ozone.</p>	kg O ₃ -eq	2.3	TRACI 2.1 as based on Carter, W.SAPRC Atmospheric Chemical Mechanisms and VOC reactivity scale (2010)
	<p>Ozone Depletion Potential</p> <p>Air pollution from man-made emissions to the atmosphere that have the ability to destroy ozone that protects the earth from UV sun-rays.</p>	kg CFC-11 eq	3.1 x 10 ⁻⁷	TRACI 2.1 based on Handbook for the International Treaties for the Protection of the Ozone Layer (UNEP-SETAC 2000)

Setu Multipurpose Chair with Lyris 2

Detailed Life Cycle Impact Assessment

	LCIA Results	Unit	Total	Raw Material Production	Product Production	Distribution and Retail	End of Life
	Acidification Potential	kg SO ₂ -eq	2.1x10 ⁻¹	2.1x10 ⁻¹	3.4x10 ⁻³	7.0x10 ⁻⁴	2.0x10 ⁻³
	Eutrophication Water	kg nitrogen-eq	3.7x10 ⁻²	3.6x10 ⁻²	4.8x10 ⁻⁴	4.5x10 ⁻⁵	5.2x10 ⁻⁴
	Global Warming Potential	kg CO ₂ -eq	4.8x10 ¹	4.6x10 ¹	1.7x10 ⁰	1.4x10 ⁻¹	4.6x10 ⁻¹
	Photochemical Ozone Creation Potential (Smog)	kg O ₃ -eq	2.3x10 ⁰	2.1x10 ⁰	8.0x10 ⁻²	2.1x10 ⁻²	4.5x10 ⁻²
	Ozone Depletion Potential	kg CFC-11-eq	3.1x10 ⁻⁷	2.9x10 ⁻⁷	2.1x10 ⁻⁸	1.0x10 ⁻¹²	1.2x10 ⁻¹¹

Life Cycle Impacts of the Setu Chair

GREENGUARD Certified
Products are certified to GREENGUARD standards for low chemical emissions into indoor air during product usage. For more information visit ul.com/gg.

Cradle to Cradle Certified™ Program
A multi-attribute program that assesses products for safety to human & environmental health, design for future use cycles, and sustainable manufacturing processes.

level® Certification
The level conformance mark ensures a comprehensive, independent, and impartial assessment of the environmental and social impacts of a product.
